

## Help Your Athletes Achieve Their Best Swing!

The SensorEdge Home Plate System enables athletes to increase power and effectiveness in their swings. It will record and measure the foot positions, individual pressure points, center of gravity changes, weight distribution shifts, and video to best assess athlete's performance and improve consistency in their game.

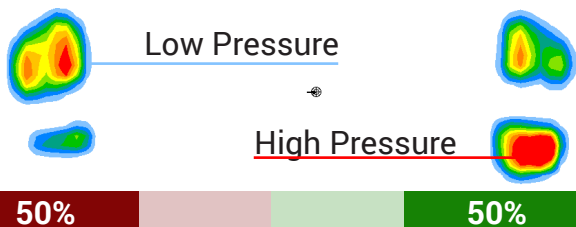

## How Can the Home Plate System Help?

- Use videos and pressure maps to better understand the mechanics behind an athlete's unique swing.
- Use comparative files to show improvements throughout practice with the machine.
- View pressure distributions independently between the left and right feet.
- Simple, one-cord set up between the unit and a computer.
- Easy to use and portable units come in USB or wireless versions.
- Differentiate yourself from your competitors with the latest technology.

## The System

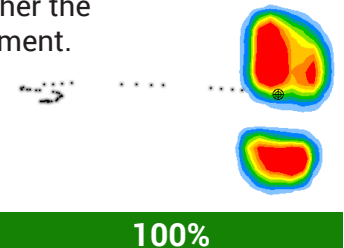

### Standing Phase

Vivid pressure mapping shows the areas the batter places the most weight.

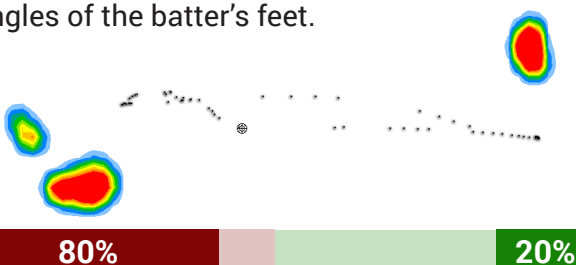

### Loading Phase

Track the movement of the batter's center of gravity. The farther the dots, the faster the movement.

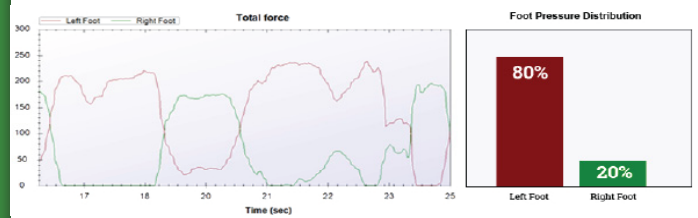

### Launching Phase

View changes in the rotation and angles of the batter's feet.

### View Pressure on Each Foot

Informative graphs provide visual aids to verbal trainings and feedback.

## Technical Specifications

Sensing Area	Resolution	Pressure Range	Frame Rate	WiFi Option
19.2" x 38.4"	2,000+ points	0 - 30 PSI	100 frames/s	Yes

### Balance Plate

Our Balance Plates are among the most portable, accurate, and durable pressure mapping systems in the world.

At 39.5 inches long, 20.5 inches wide, and only 1 inch tall, they can be transferred easily between storage and use indoors and out.

The Balance Plates can also be embedded level with your artificial turf for a seamless batting experience.

### WiFi or Wired?

Our Balance Plates are available in wireless and wired versions. The wireless version connects to your computer or tablet's wireless network adapter with a battery life of 4 hours. The wired version connects to your device easily through one USB cable.
